

# Over 75 studios in Canada...

## ...and counting

Did you know that over 600 broadcast studios around the globe now rely on Axia IP-Audio networking technology? Frankly, we're amazed and humbled — that's a pretty big number for such a young company. In fact, our clients have made Axia the **fastest growing console company** in radio.

And over ten percent of those Axia studios are on-the-air in Canada, for clients like **Newcap Radio, Corus Entertainment, Golden West, Rawlco** and **XM** (to name just a few). In fact, In Alberta alone **11 out of 12 newly licensed stations** chose Axia.

So, to our clients we say "thanks" for your trust and enthusiasm. And to those of you who aren't yet clients: we're ready when you are.

**Coming to CCBE?** Visit us in the Pippin Technical Hospitality Suite.
